

Route planning screen:
Scrollable menu that shows user
all possible routes from current
live location or a selected location
to a destination.

Button that allows user to
turn on live location

Button to swap starting
location and destination
(only possible with a
single stop).

+ button allows user to
add stops to their route.

Small clickable textbox that allows
user to choose departure time.

Menu that allows user
to change sorting
priority and add filters
to search.

Looks like this when a
filter is applied: 📏

Multiple routes shown
with basic information.
Sorted by least time taken
to arrive at location by
default.

Favorite button to
save the route.

Clickable button that displays alert
information (e.g., delays, extreme
weather conditions, cancellations)
