

Alert Info Screen:  
When user taps on an alert, this screen is displayed over the top. User can see all current and upcoming alerts for each transport type.

Alert info name

Dates that the content of the alert will be active for.

Information of the alert. Includes the impact, stops affected, and any further information the user may require (e.g., stop has been moved to y location).

When information on the alert was last updated.

User can tap the 'x' or anywhere on the darkened area of the screen to close the alert info screen to see all alerts again.
